

ecologic[®] PLASTER TAKCOAT[™] *Platinum*^{*}

Self-Adhering Lime Plaster Base coat

FOR PROFESSIONAL MASONRY RESTORATION AND SUSTAINABLE BUILDING SYSTEMS

- Breathable
- Excellent Modulus of Elasticity
- Easy Mixing on Site
- NO Volatile Organic Compounds
- NO Portland Cement, GGBS, or Gypsum Additions
- Contains Over 75% Post Consumer Recycled Content (Ground Bottle Glass)
- Excellent Adhesion to most rigid substrates, these include wallboard for interiors and Durock[®], or any masonry that is sound, even pre-painted surfaces, with mesh embedded to span all cracks
- LEED Friendly

TAKCOAT[™] Platinum^{*} (TCP) is a specially formulated environmentally friendly self-adhering lime plaster base coat for interior and exterior transitions from sound substrates to an Ecologic[™] lime plaster/stucco system. With TAKCOAT[™] Platinum^{*} there is no need for first priming, sanding or installing lath. TAKCOAT[™] Platinum is typically trowel applied in a thickness ranging from 1/32-1/4 inch. Made from over 75% post consumer recycled glass, hydraulic lime, natural glues, and special performance additives. TAKCOAT[™] Platinum^{*} is exceptionally environmentally friendly, easy to use, and great for any LEED project. LimeWorks.us demands their ^{*}"Platinum" level products to be 100% material sourced and produced in the U.S.A

When TAKCOAT[™] Platinum^{*} has cured for at least 18 hours it is ready to receive additional applications including Ecologic[™] Plaster TOPCOAT[™] in either Coarse-sanded grade (G) or the Fine-sanded grade (F) for exterior Stucco. Cured TAKCOAT[™] Platinum^{*} can also be sheltered with Silicate Mineral Paint, Lime Paint, or an appropriate breathable paint.

Interior applications where TAKCOAT[™] Platinum^{*} is exposed to damp or even humid conditions it is suggested to add a 1/3 cup of Borax[®] to each gallon of mixing water used to blend TAKCOAT[™] Platinum^{*}. Also use this recipe as the mixing water for Ecologic[™] Whitewash or TOPCOAT[™] plaster to defend against the potential for mold.

TAKCOAT[™] Platinum^{*} is a dry powder which comes stock as "brilliant white" and supplied in 50lb bags.
Simply add water, mix and go to work.
